Financial Services

Client 360° Views

Unify customer data across systems with Microsoft Fabric to personalise financial advice and improve client retention.

AI-Powered Risk Analysis

Use Copilot in Power BI to detect anomalies, assess portfolio risk, and automate reporting.

Fraud Detection at Scale

Deploy AI models across Fabric to analyse transactions in real-time and reduce fraud losses.

No more siloed data. No more guesswork. Just faster insights, smarter decisions, and measurable impact - all within the Microsoft ecosystem.
