

Your Roadmap to Data Value

Fast-Track Proof of Concept
with Copilot & Fabric

Phase 1: **Discovery**

Starting with a focused assessment, we work with you and your stakeholders to uncover your most pressing data challenges

Do these data challenges sound familiar?

- Incomplete and inconsistent data that makes reporting unreliable and inaccurate.
- Data silos and difficulty integrating data from multiple sources.
- Lack of scalability when handling increasingly larger volumes of data.
- Threat of cyber attacks and protecting sensitive data.

The Outcome:

Clear success metrics identified with mapped data access.

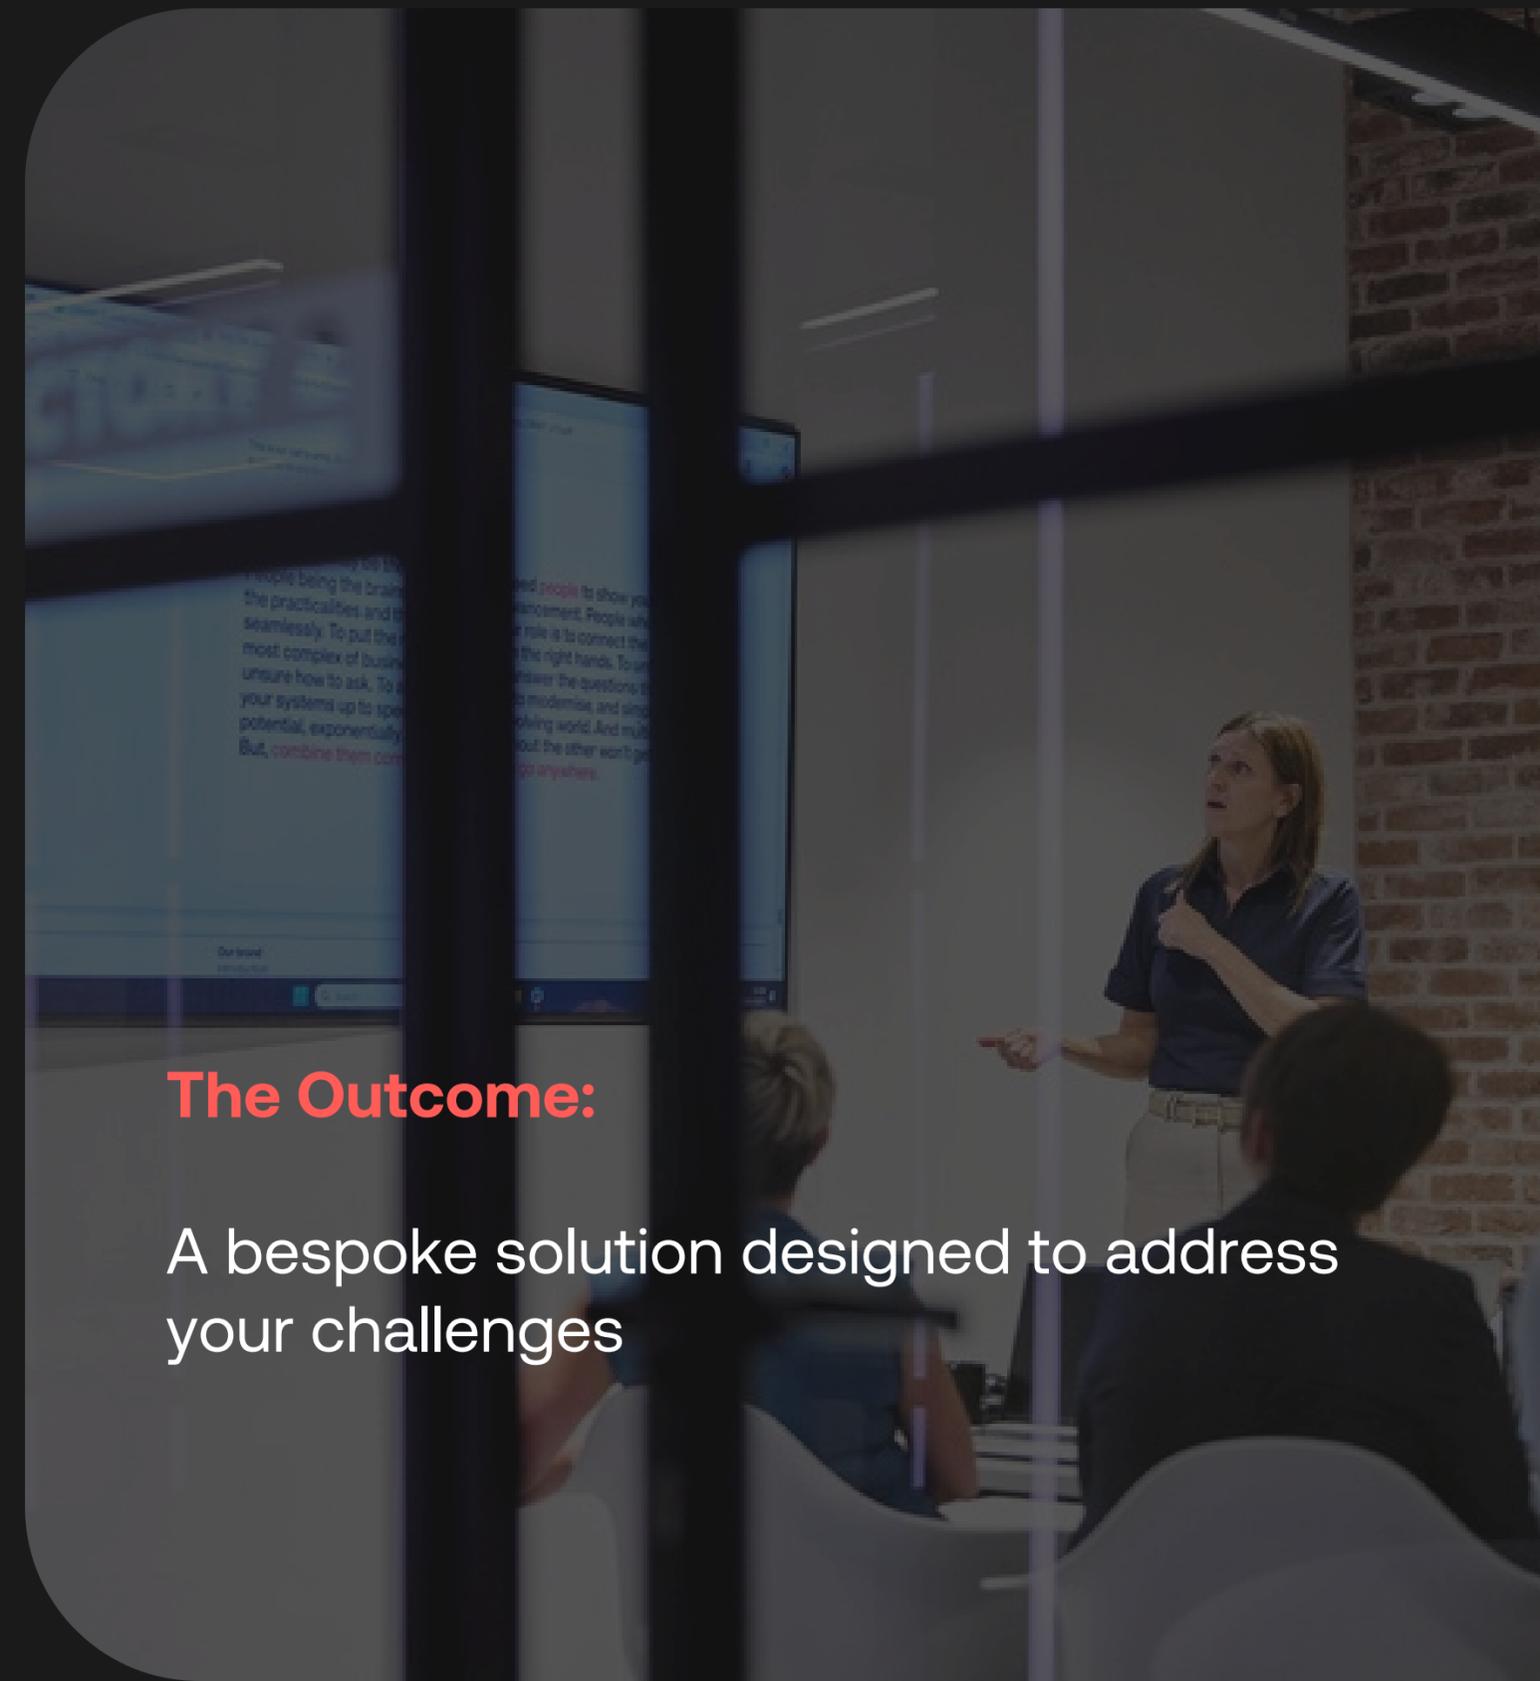

Phase 2: Design

With a clear challenge defined, we architect a purpose-built solution that leverages Microsoft Azure, Fabric, and Copilot to deliver target outcomes.

The Outcome:

A bespoke solution designed to address your challenges

Phase 3: Build & Deliver

Building and delivery of a proof of concept ready to be tested by your team with real data and real users.

- ✓ Validate capabilities without a huge budget
- ✓ Real results with real data
- ✓ Fully scalable to your needs
- ✓ Delivered in weeks

The Outcome:

A working proof of concept that demonstrates value in 4-6 weeks

Phase 4: Enablement

We deliver the outputs of the proof of concept and collaborate on how to scale the solution across your organisation.

Infrastructure
Azure

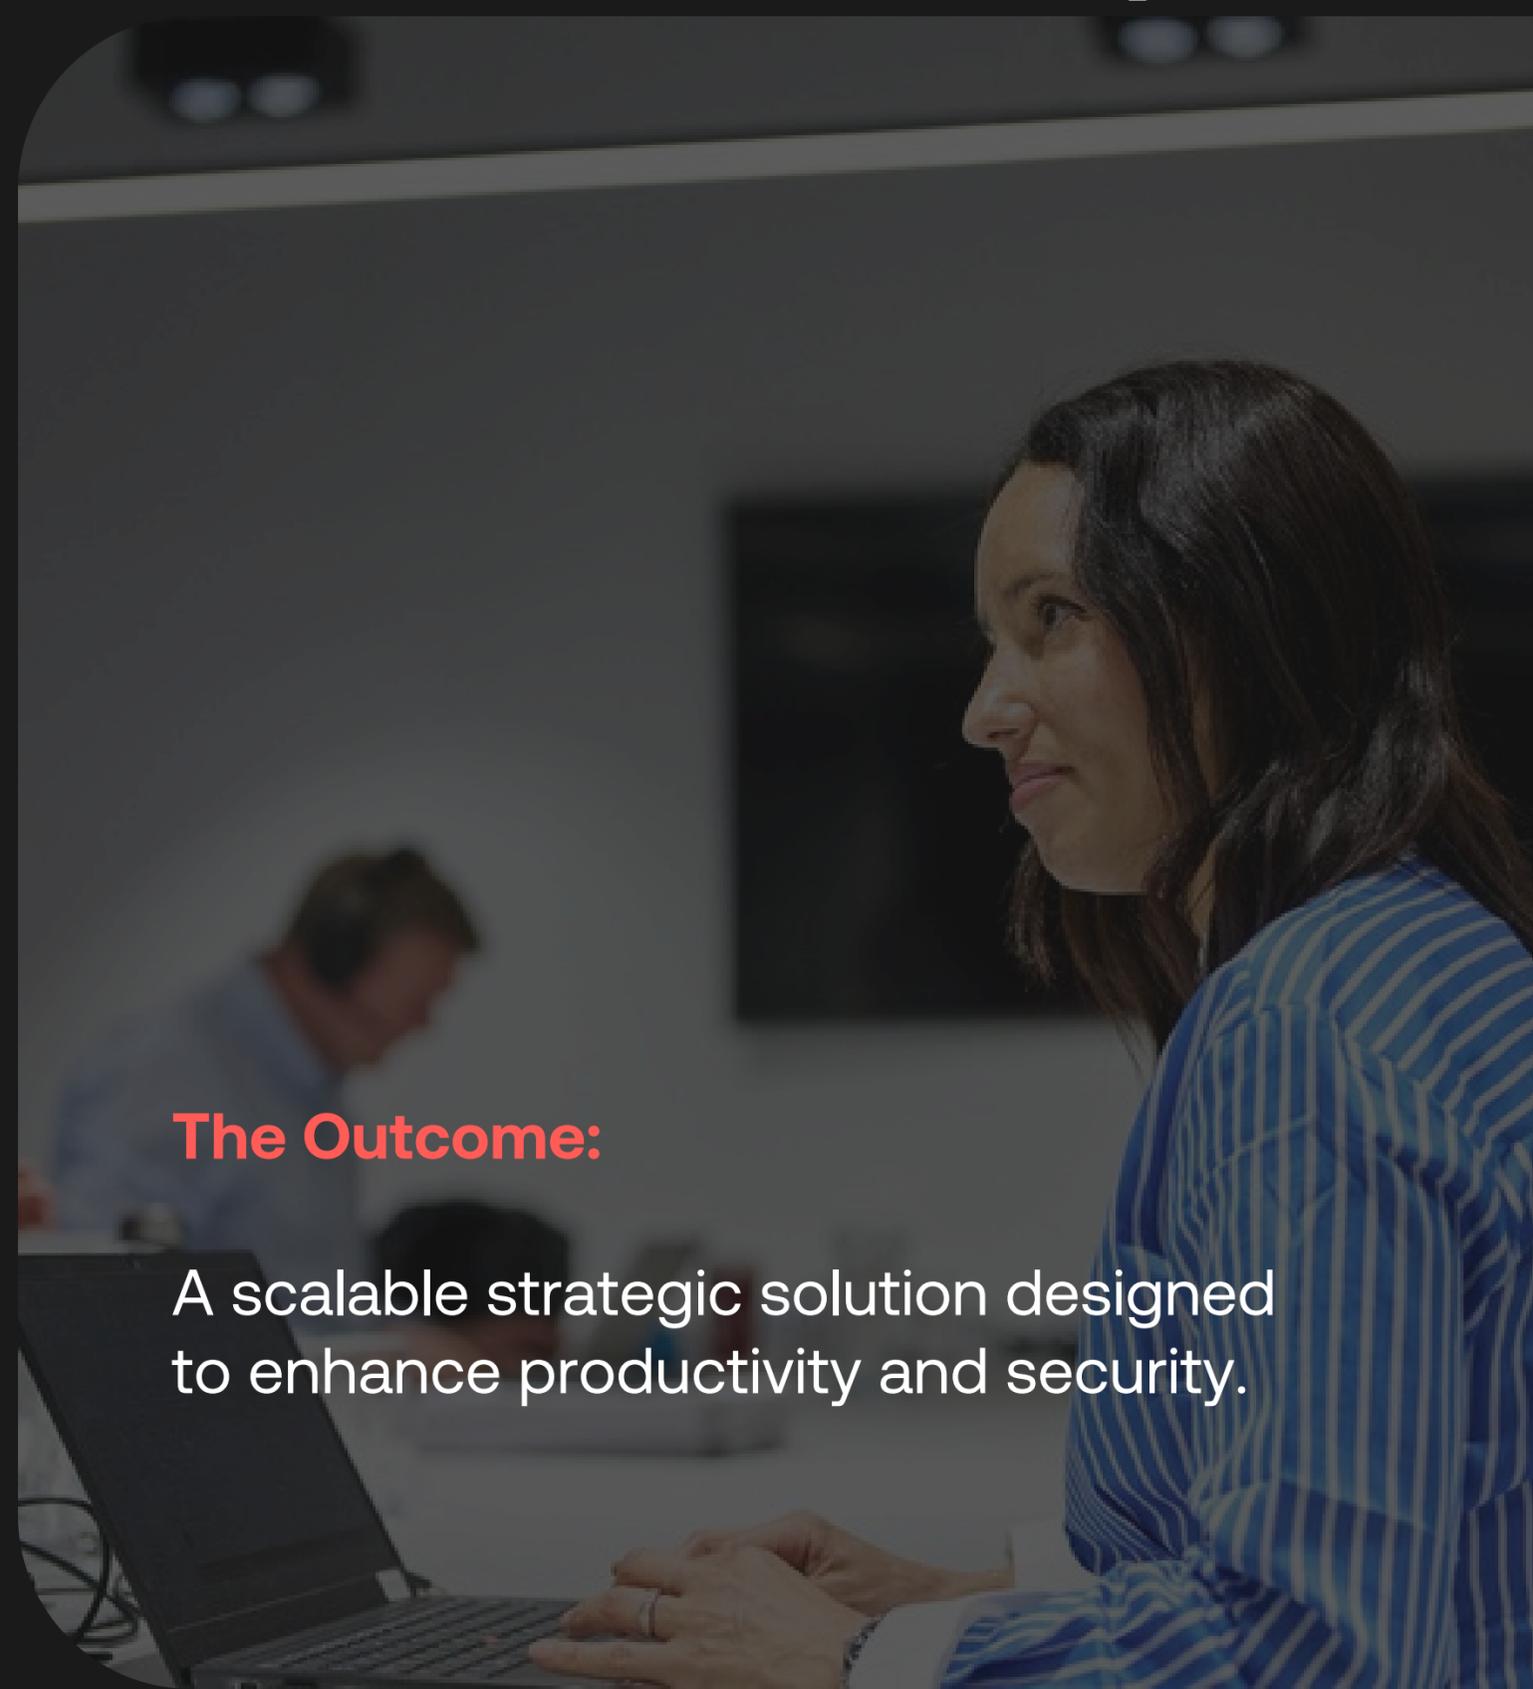

Data & AI
Azure

Digital & App Innovation
Azure

The Outcome:

A scalable strategic solution designed to enhance productivity and security.

Phase 4: Enablement

At TXP, we modernise organisations. We solve complex problems by combining the best of technology and people. We multiply the potential of our clients, helping them to build a stronger future.

OUR VALUES

Engaging with TXP is simple. Our extensive accreditations mean we're ready to support you on complex and challenging projects. As well as working with clients, we work in partnership with systems integrators, specialist providers, and consultancies to deliver value to everyone that we support.
